About Us

BrightSword specializes in conceptualizing and developing innovative IT solutions that cater to the unique needs of its clients. With a desire to provide future proofed solutions to our clients, we have developed a R&D competency centre that keeps abreast with new and emerging technologies. We are keenly interested in building solutions that embrace Automation, Analytics, Cloud Services and are API enabled. Over the years we have gained significant expertise in the Health Insurance, Education, Retail and Banking domains.

Our Mission

“To walk worthy of the vocation to which we are called...”

Our Quality Policy

“Commitment & Excellence”

We embody our core values of Teamwork, Honesty, Respect, Innovation, Value, and Excellence in all our endeavors and relationships. Our strong work ethic and lasting customer relationships enable us to truly THRIVE.

Business Solutions

We specialize in providing business solutions that may be configured or customized to fit the business requirements of our clients. These solutions may either be deployed on premise or may be subscribed to as a service. Listed below are some of our featured solutions.

Health Insurance

Medicare is our suite of managed care solutions that are used by Insurers, Third Party Administrators, Brokers, Healthcare Providers, Policy Holders and Policy Members.

Education

BrightSkool and eduJournal are our solutions that cater to a wide range of educational institutions – Pre Schools, High Schools, Vocational Training Institutes, Music and Sports Schools, Workshops and Seminars.

Banking & Finance

BrightSword is Microgen Financial Systems' exclusive Partner in Singapore. We provide local consultancy and support to prospective and existing Microgen 5Series customers across Asia.

Retail

GoSocial is a social media and digital marketing SAAS platform that enables Retail customers to promote their products and services across multiple social media platforms from a single application.

Technology Competency

Our technology competency includes all the modern variants of technologies that enable lean and agile development and continuous delivery. We help our customers to choose the best stack as per the nature of the business and non-functional requirements. We rationalize and suggest appropriate scripting languages, testing frameworks, UI frameworks, continuous integration tools, search frameworks, databases and hosting platforms based on what the business demands all the while keeping in mind the cost of development and Total Cost of Ownership (TCO).

Programming Languages	       
Database	    
Enterprise Solutions	  
BI / AI / ML	      
Open Source	   

"We ensure that all the components gel together and make the system scalable and high-performing"

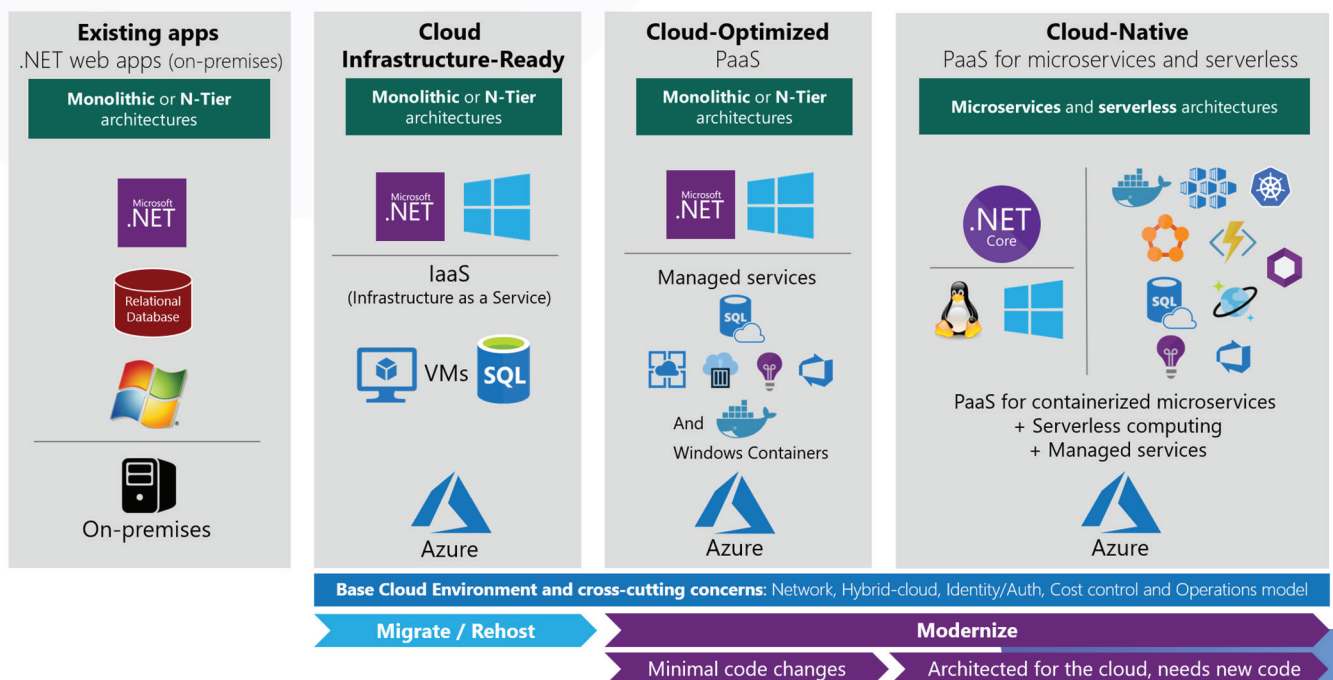

Application Modernization

We have years of proven ability in building, integrating, and extending Windows-based applications and infrastructure solutions to the cloud on the Microsoft Azure cloud platform. We are proficient with all the below architectures.

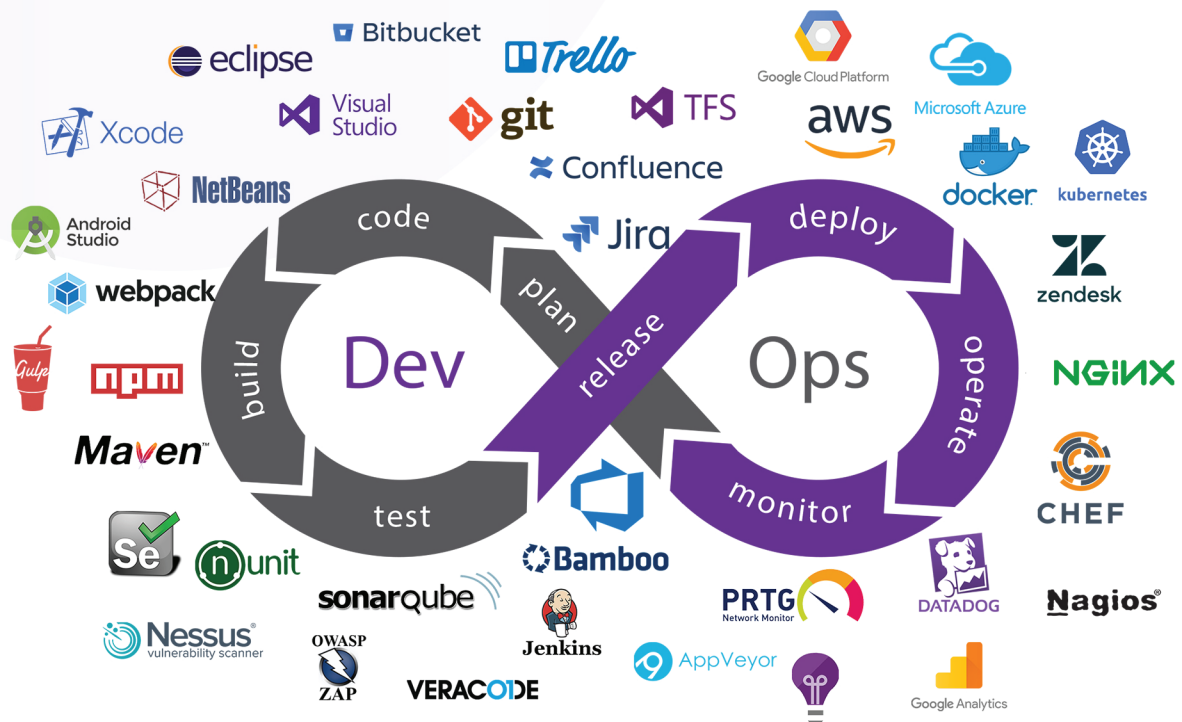

Maturity model for .NET applications modernization

Microsoft

Dev Ops

We use a wide range of tools and technologies to carry out and implement our Dev Ops Quality Processes. Listed below are some of the tools that we have used for Planning, Development, Quality Assurance, Configuration Management, and Deployment & Release Management.

"Our methodologies combine industry best practices on design, agile development, DevOps and cloud to build and deliver innovative and scalable solutions."

Clients

We work closely with a wide range of clients from different sectors and regions to develop enterprise and end user applications that can be deployed on the cloud or on premise. Some of our key clients include:
